Undergraduate Studies In Canada

For those interested in undergraduate studies in Canada, please note that you can come to Canada to study at the undergraduate level and your options would be:

- 1. A 2 years diploma (equivalent to an ND in Nigeria)
- 2. A 3 years advanced diploma (equivalent to an HND in Nigeria).
- 3. A 4 -5 years Bachelors program

Admission Requirements (For diplomas and advanced diplomas)

The admission requirements for the diploma and advanced diplomas are:

A Secondary School Certificate, or equivalent including the following required subject(s):

- English
- Mathematics

Note that some programs so not require Mathematics as a required subject

Bachelor's Degree

For a Bachelor's degree, the requirements are as follows:

Usually, applicants must present the credential required for entry to degree-level study in their home province/country.

For applicants from West Africa, they will be considered for admission with completion of the Senior School Certificate offered through the West African Examinations Council (WAEC) or the National Examinations Council (NECO). The minimum number of subjects required are noted below:

- Nigeria a minimum of 8 subjects
- Ghana a minimum of 6 subjects

 Gambia – a minimum of 5 courses, including both English and mathematics

A minimum overall average of C4 is required for admission consideration.

Note that some schools and programs might have slightly different requirements.

However, please note that the attainment of the minimum credential does not guarantee admission because additional factors, including academic standing, program choice, program prerequisites and English language proficiency are also part of the admission decision.

For Those Interested In Medical Sciences

Prospective students that are interested in a **Bachelor of Science (BSc) in Medical Sciences,** they would be required to have the same requirements for a Bachelors as well.

The **Bachelor of Science (BSc) in Medical Sciences,** focuses on the biophysical foundation of human health, with courses in anatomy, physiology, chemistry and biology, in addition to the social aspects of health. The program has been developed for those who want to continue studies in medicine, dentistry, rehabilitation or occupational therapy, among others.

For undergraduate programs, all costs associated with program requirements are the responsibility of the student.

However, many schools have entrance scholarships and other scholarships that reduce the financial burdens for students.
